RELEVANT EXPERIENCES

Full Stack Developer   May 2023 – Current
Virtual Hospitals Africa - *Remote*

- Integrated Google Calendar and WhatsApp Cloud API for scheduling appointments through a chatbot
- Extracted medias from WhatsApp Cloud API to database and implemented retrieval via front-end routes and endpoints.
- Developed database migration scripts to update database schema
- Participated in meetings with product managers and developers around the globe to discuss product requirements
- **Key Technologies:** Typescript, Deno.js, React.js, PostgreSQL, Whatsapp Cloud API, Github, and Heroku

Test Automation Co-op   May 2022 – December 2022
Landsure Systems Ltd. - *Vancouver, B.C.*

- Developed 30+ automated tests covering a range of systems and products including webUI and REST API
- Ran 20+ regression tests per month on various releases from different development teams
- Participated in test planning, test design, code reviews, and demos with end users to gather testing requirements and feedbacks
- Created documentation including testing environment setup and step-by-step instructions for reproducing production bugs
- **Key Technologies:** Robot Framework, Selenium, Python, Rest API, RabbitMQ, Gitlab, and Jira

PROJECTS

ChronoSystem Timesheet Engine   October 2023 – December 2023
Full Stack Developer

- Developed a full-stack serverless HRM web application for project management, payroll and timesheet processing using various AWS services.
- Designed and implemented backend infrastructure using AWS Lambda functions and API Gateway for efficient payroll processing.
- Built automated email notifications for users using Lambda functions triggered by payroll events.
- Created user interface components for administrators to process payroll, manage employees and projects.
- Documented all backend routes using Swagger Hub for improved collaboration and maintenance.
- **Key Technologies:** Javascript, AWS Lambda, API Gateway, Step Functions, SES, Swagger Hub, Git, Trello

EDUCATION

Diploma of Computer Systems Technology (Cloud Computing Option)   September 2021 – December 2023
British Columbia Institute of Technology   Current GPA: 91%

Bachelor of Business Administration (Hons) in Financial Services   September 2012 – August 2016
The Hong Kong Polytechnic University

KEY SKILLS

Languages: Typescript, Javascript, Python, HTML, CSS, Java, SQL(PostgreSQL), NoSQL(DynamoDB, MongoDB), C

Tools and Operating Systems: Docker, Kubernetes, Git, Jira, Linux, AWS Lambda, Step functions, SNS, JWT

Frameworks: Node.js, Express.js, React.js, Rest API, Robot Framework, Selenium, JQuery

Practices and Domains: Object Oriented Programming, Full Stack Development, Serverless Architecture, Microservices, Quality Assurance, Test Automation, DevOps, Cloud Computing, CI/CD, Machine Learning,

AWARDS

YVR Student Hackathon – 1st place   May 2023
